

## Countertop warming showcases

The showcases are designed for the exhibition of pastry products from oven, as brioches, croissants, muffins. Particular attention was paid to design, to enhance both products exhibited that the surrounding environment.

The structure is in stainless steel sheet, polished finish. Special care is given to remove processing burrs.

Sides are in extruded, shockproof, transparent plexiglas, 6 mm thick.

Doors are in cast sheet plexiglas 3 mm thick, mould forming.

Doors are placed on two fronts to allow inside access both by the service side than the customer side (self-service usage).

At the doors are applied mould manufacture stainless steel profiles, allowing a perfect coupling to the hinges pins. The strenght hinges supporting the doors, from our exclusive concept, allow the complete opening of the doors.

Heating stainless steel heating elements, box housed, controlled by thermostat 30/90°C and signal lamp. Lighting on-off switch. Plug-in cable with plug.

A water stainless steel drip tray avoid drying of the products.
